

YOUR FAMILY'S HEALTH IS IN DANGER!

**CEMEX PLANS TO
BURN TIRES IN YOUR BACKYARD!**

The Fairborn CEMEX plant plans to burn 8,640 tires per day in a kiln not designed to burn tires

This CEMEX kiln lacks adequate emissions monitoring and proper safety measures

The EPA says tire emissions from kilns that are not well designed, operated, and maintained contain dangerous toxins causing cancer, asthma, birth defects, heart attacks, and other serious health problems

PROTECT YOURSELF AND YOUR FAMILY!

Write and call

Ohio EPA Director Chris Korleski now! Tell him to STOP Cemex's tire burning before it starts!
